Architecture & Design

Build portfolio as a
designer/junior architect

Earn Master's Degree in
Architecture

Obtain licensure to practice
Architecture

Hello –

I'm a detail-oriented designer who values quality and thoughtful design, and I will be a great asset to your team.

Throughout my years spent discovering my interests and strengths, I have consistently been drawn to that which balances creativity with innovation. **I place great importance on seeing ideas thoroughly considered while also questioning initial solutions to seek opportunities that further the concepts of design.** This tendency of mine is one of my greatest assets and surely reflects itself in the work that I do.

Growing up in Milwaukee, I have had the pleasure of watching the diverse roots of this city bloom into an environment that promotes kinship now and will continue to do so for generations. I believe this sense of kinship is strengthened through access to well-designed public environments, and **I hope to use intriguing design to draw the public together through the built environment in meaningful, lasting ways.**

Fascinated by contemporary urban development, I am motivated to continue refining my ability to solve complex problems while remaining attentive to experience, context, and placemaking. As I grow as a designer, I hope to shape how people experience their surroundings, connecting communities to their environments memorably. **My desire to never stop growing and learning will be something that takes me far in this industry.** I am committed to this, and to contributing thoughtfully within a collaborative studio environment.

I look forward to communicating with you and thank you for your consideration.

Sincerely,

Makenzie R Cincotta, A.A.S. Architectural Drafting/Construction Technology, A.A.S.
Interior Design, IIDA Student Member, ASID Student Member, NKBA Student Member

PROFESSIONAL

February 2023 – May 2023

DESIGN INTERN

J&J Contractors LLC – Greendale, WI

Assisted in increasing general efficiency of projects. Kept project documentation up-to-date and accurate to ease production and mitigate miscommunications. Performed tasks in and out of the office that ensured materials are where they needed to be when they needed to be there. Updated product documentation to offer designers correct options for selection. Communicated with office staff to relieve extra tasks that may have disabled them from productivity. Created content for company promotion and media presence.
